

**East Coast Risk Management is now certified to provide SafeLandUSA training!**

Many operator oil and gas companies involved in the Marcellus Shale Formation are requiring that the employees of their contractors successfully complete a SafeLandUSA orientation program and also carry with them, an official photo-ID indicating they have completed the SafeLandUSA orientation. The SafeLandUSA training course is the accepted course for companies such as: Anadarko, BP American, ExxonMobil, Shell, Marathon, Tetra Technologies, Encana O&G, and many other employers in the oil and gas industry.

SafeLandUSA training will provide general safety information that an employee should know before performing their specified work duties. Upon completion of this program, each attendee will be issued a photo-ID stating that they have been successfully trained and have an understanding of the safety issues in the oil and gas industry. Please contact Aaron Black, Manager of Business Development at (724) 864-8745 for additional information.
